DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 08 December 2003 has been entered.

Allowable Subject Matter

2. Claims 1-20 are allowed.

3. The following is an examiner's statement of reasons for allowance: The prior art to Zacharias teaches a secure multi-application card system, however the prior art of record, taken alone or in combination, fail to teach or fairly suggest a system comprising a terminal device configured to interface with a multi-use card, wherein the multi-use card was initially issued by an independent financial institution to represent a single independent credit account with the financial institution prior to use as a multi-use card; and a processor configured to access a database, to send information to the terminal device, to receive information from the terminal device and the database, and to generate charges on the selected account wherein the processor queries the database to determine the types of accounts that can be used for the financial transactions and

limits the information sent to the terminal device to the accounts that can be used for the financial transactions.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hirka et al (US 2003/0061157) discloses a multiple account advanced payment card and method of routing card transactions; and Gatto (US 6,149,055) discloses an electronic fund transfer or transaction system.
